Syed Ashar Iqbal

(321-512-8514) | Syed.Ashar779@gmail.com

Education

University of Central Florida Orlando, FL

Bachelor of Science in Computer Science Aug. 2024 – May 2028 (Expected)

University High School Orlando, FL

High School Diploma – IB DP Program, 3.3 GPA Aug. 2020 – May 2024

Experience

Orange County Public Schools Orlando, FL

Technology Intern June 2023 – August 2023

- Reimaged and deployed software across a large fleet of student laptops, ensuring all devices were updated to the latest system configurations.
- Maintained accurate inventory records of delivered laptops, tracking assets in the district's archive system to support efficient device management.
- Installed and configured classroom telephones and updated Smartboard systems across multiple school sites.
- Provided Tier 1 and Tier 2 technical support to staff and students; cleared Level 2 background screening for campus access.

Five Below Orlando, FL

Sales Associate June 2022 – December 2022

- Managed store opening and closing procedures, including accurate handling of cash and credit transactions and end-of-day reconciliation.
- Performed inventory management and participated in inventory audits across multiple store locations in the Orlando area.
- Delivered strong customer service at the front desk and throughout the store, resolving inquiries and guiding purchasing decisions.

Projects

MySPIM – MIPS Processor Simulator C Language

- Designed and built a fully functional MIPS processor simulator in C, implementing all five core datapath stages: instruction fetch, decode, execute, memory access, and write-back, closely mirroring real hardware behavior.
- Implemented instruction decoding logic for R-type, I-type, and J-type instruction formats, with proper management of the register file, program counter, memory array, and control signal generation.
- Wrote comprehensive test cases to validate simulator correctness across a range of MIPS programs, gaining deep practical experience with low-level architecture, assembly language, and digital logic.

Technical Skills

Languages: Java, C, Python

Developer Tools: VS Code, Code HS, Eustis

Technical Skills: MIPS Assembly, Object-Oriented Programming, Low-Level Computer Architecture, Instruction Set Design

Relevant Courses: Computer Science 2, Computer Logic and Organization

Certifications: IBM ML0101EN (Machine Learning), AI Fluency: Framework & Foundations, Claude 101 (Anthropic)

Achievements and Activities

- Bright Futures Academic Scholarship – awarded 100% tuition coverage based on academic merit.
- Science Olympiad – competed as a team member in regional and district-level events.
- Varsity Tennis – represented University High School on the varsity tennis team throughout high school.
